CAUTION

Please read these instructions and warnings before using this product, and carefully read the manual and parts list before the first use of the batteries.

CAUTION
To avoid personal injury and property damage please follow the below instructions.

1. Panasonic Ni-MH rechargeable batteries are recommended to be used in this charger.

2. Do not use non rechargeable batteries in this charger.

3. Do not open or disassemble the charger.

4. Do not allow the charger to get wet or to expose the charger to water or other liquids.

5. Only use the charger indoors and in a dry location.

6. Do not use the charger if the charger is damaged.

7. Do not use or expose the charger to direct sunlight.

(1) This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

(2) Children shall not play with the appliance.

(3) Cleaning and user maintenance shall not be made by the children without supervision.

OPERATING INSTRUCTIONS
You can charge a single AA or AAA battery up to four at a time (Fig. 3)

1. Observe the correct polarity by matching the positive (+) and negative (-) on the battery to the positive (+) and negative (-) on the charger. Insert the battery from the right end (Fig. 2)

2. Plug the charger into a standard 100-240 V AC outlet. The LED light green means the charging is complete. The LED light green means the charging status. Diagnosis of the status of the batteries is indicated by the LED light green.

3. The charger will indicate that charging is conducted through the indicator light green.

1. The LED light according to the current remaining charge of the batteries, the charging status.

2. The LEDs will change as follows according to the charging progress.

LED status	Remaining charge / battery status
Light red	20% or less
Yellow	20% to 80%
Light green	80% or more

Charging complete
Blinking yellow Battery replacement recommended

Error
Blinking red (Invalid batteries (i.e., non-rechargeable) inserted)

The automatic charge indication should not be used as a rough estimate. Charging durations will vary depending on the state of the batteries and the ambient temperature. Therefore, be sure to charge the batteries until the LED turns off.

If the indicator does not light or flicks:

1. Make sure that the batteries are inserted correctly and that the battery contact is made with good contact.

2. Check that the power plug is correctly inserted into the power outlet.

3. Check that the batteries are not damaged and are recharged.

4. Check that the LED light green is lit when the battery is disconnected from the charger from the AC outlet, and remove the charged batteries.

5. Clean the terminals with a dry cloth to remove dirt and grime.

MAINTENANCE, CARE AND CLEANING

• Clean with a dry cloth to remove dirt and grime.
