

VicAudiophile VMT Kit

HI-FI & HOME CINEMAS

Description

No matter how efficient a Hi-Fi system is, if room acoustics is not properly addressed, you will end up hearing more energy coming from the room than from the loudspeakers. VicAudiophile VMT Kit was developed to improve room acoustics with 4 Flat Panel VMT with VicSpacer Plus, for enhanced absorption performance, 4 units of VicPattern Ultra Wavewood and 2 units of Multifuser Wood MKII 64, for sound diffusion, available in 3 different finishes (Natural Oak, Brown Oak and White Matte), including exclusive VMT colors such as Sage Green and Natural Linen, only available for this kit.

Depending on your goals, available space and budget, you can improve the acoustics of your room, either all at once or in different steps, by acquiring one or several kits. You can start with one kit to treat first reflections from side and front walls, step forward to improve ceiling treatment with a second kit and fully treat your room including back walls in a third step.

You can change the configuration of your room anytime. Thanks to the VicFix J Profile fixation system, you can alternate sound absorbing and sound diffusion panels depending on your preferences or if you are listening to Classical or Popular Music. Using VicFix Corner, you can also use VicSpace Plus Flat Panel VMT and VicPattern Ultra as bass trap in the corners.

VicAudiophile VMT Kit contents:

- 4 units of Flat Panel VMT (1190 × 595 × 20 mm) with VicSpacer Plus (enhanced acoustic performance)
- 4 units of VicPattern Ultra Wavewood
- 2 units of Multifuser Wood MKII 64
- 6 units of VicFix J Profile 595 mm
- 2 sets of VicFix Corner (4 units, usable for 2 panels)

Available Finishes *

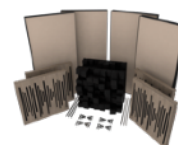

/ White Matte

/ Natural Oak (with VMT Sage Green and Multifuser Natural Wood)

/ Brown Oak (with VMT Natural Linen and Multifuser in Black Matte)

* Different batches may show a color variation
