

VicStudio VMT Box

PROFESSIONAL AUDIO

Description

VicStudio VMT Box was developed as an upgradable acoustic kit for Home Studios using the latest VMT technology, with sustainability, health and comfort in mind. The Flat Panel VMT available on this kit is a sustainable solution alternative to standard absorbing foams.

Vicoustic developed Virtual Material Technology taking into account a holistic approach by fully integrating its acoustic performance with other sustainability goals, such as human health (air quality), human safety (fire), use of recycled materials (VMT is made of VicPET Wool, produced mostly from recycled plastic) that are also recyclable.

Depending on your goals, available space and budget, you can improve the acoustics of your studio, either all at once or in different steps, by acquiring one or several kits.

VicStudio VMT Box contents:

- 6 units of VicSpacer Plus with 6 units of Flat Panel VMT for enhanced acoustic performance
- 4 units of Multifuser DC2
- 2 sets of VicFix Corner (4 units, usable for 2 panels)
- 1 unit of glue

Available Finishes *

* Different batches may show a color variation
