

PZ-Deluxe - Order # R800 7320

The PZ-Deluxe™ is a spectacular quality preamplifier and DI box disguised as a foot pedal. Features include: input level control, powerful semi-parametric EQ for voicing plus a low-cut filter to eliminate resonance. Separate 1/4" outputs feed a stage amp and tuner plus a built-in Radial DI feeds the PA. Unique to the PZ-Deluxe is the PZB booster that at once increases the input impedance to 10 meg-Ohms and boosts the signal. This enables piezo transducers to connect directly without having to cut a hole into the guitar to add a preamp. A variable power booster with footswitch for soloing and a mute footswitch shuts off all outputs except the tuner for silent on-stage adjustments. The balanced Radial DI output is equipped with a ground lift switch to help eliminate hum & buzz caused by ground loops and a 180° polarity reverse to eliminate hot spots on stage which often cause feedback. A 15 volt – 400 milliamp power supply provides added headroom to reduce distortion and maximize dynamics.

### Features

- Studio quality preamp in a pedal
- Built-in Radial DI with balanced XLR output
- Powerful EQ for tone shaping
- Separate outputs for stage amp and tuner

### Applications

- Works with all types of pickups including piezos
- Extended bandwidth works great on upright bass
- Sounds amazing on violin, dobro, mandolin
- The perfect front end for an acoustic solo gig

### Cool Functions

- Amplifies any instrument without external preamp
- Power booster lets you increase gain for soloing
- Mute lets you quietly tune on stage
- Plug & Play easy to use

### Dimensions (W x D x H)

- 5.75" x 3.75" x 2" (146mm x 95mm x 52mm)
- Includes 15VDC power supply
- 3 Year transferable warranty

**TUNER** - Always-on tuner output for on-the-fly adjustments.

**DI OUTPUT** - Built-in Radial direct box sends balanced output to the PA system.

**LEVEL** - Input level control sets the overall gain of the preamp.

**LIFT** - Ground lift switch helps eliminate hum & buzz caused by ground loops.

**EQ** - Powerful 3-band semi-parametric EQ for maximum tonal range.

**PZB** - Side-accessed PZB booster increases sensitivity and impedance for piezos.

**MUTE** - Footswitch with LED for silent on-stage tuning.

**HPF** - Lo-cut filter eliminates feedback from low frequency resonance.

**BOOST LEVEL** - Set-&-forget level control for the power booster.

**OUTPUT** - Hi-Z output for the on-stage instrument amp.

**180°** - Phase reverse helps eliminate on-stage hot spots to reduce feedback.

**BOOST** - Footswitch with LED indicator offers up to 15dB of boost for solos.

### Going direct with your acoustic instrument

Take your PZ Deluxe to any gig! The PZ-Deluxe is super easy to use and sounds great! Plug in your guitar and connect the XLR output to the PA system. Adjust the tone and levels to suit. For solos, activate the built-in power booster and rise above the din! In between songs, mute the output to quietly tune.

### Concert touring made easy!

A separate 1/4" output for your stage amp plus a built-in Radial DI lets you send your sound to the stage and PA at the same time. This lets you control your sound the way you like it. For an orchestral instrument with a piezo transducer, turn on the PZB and enjoy the best tone ever.
